# HOW THE TRADE SIZE IS CALCULATED

Remember, the system calculates the trade size automatically!!!

All you need to enter is the equity you want allocated for the trader

*CopyKat trader* will do the rest for you!

The following pages are simply an explanation  
but you will never need to do this calculation

# HOW THE TRADE SIZE IS CALCULATED

## Example:

- ❖ Master Trader has \$50,000 in his account
- ❖ Master opens trade of 1 lot USDJPY (\$100,000)

Master used 2:1 leverage  
(ie \$100,000 position with \$50,000 equity)

- ❖ You have Allocated Equity of \$2,000
- ❖ Your trade size will use same leverage as trader ie 2:1

Your trade size will be 0.04 lots  
(ie  $\$2,000 * 2$ )

# HOW THE TRADE SIZE IS CALCULATED

## Example 2:

- ❖ Master Trader has \$10,000 in his account
- ❖ Master opens trade of 1 lot USDJPY (\$100,000)
  
- Master used 10:1 leverage  
(ie \$100,000 position with \$10,000 equity)
  
- ❖ You have Allocated Equity of \$2,000
- ❖ Your trade size will use same leverage as trader ie 10:1
  
- Your trade size will be 0.2 lots  
(ie  $\$2,000 * 10$ )
